

VERIDIAN

SECURE MOBILE APPLICATION DEVELOPMENT

CAPABILITIES BRIEF

Mission-Ready iOS & Android — Zero Trust. Secure by Design. Built for Federal Environments.

What We Deliver

- Mission-ready mobile applications — iOS and Android with Zero Trust security integrated from design through deployment — not bolted on after the fact
- Secure by design architecture — features, APIs, and data transmissions hardened to federal civilian and DoD standards
- Offline-first for DDIL environments — full functionality without network connectivity, synchronized when connection restores
- Compliance-aligned from day one — NIST, CMMC, and FedRAMP frameworks built into every sprint, not retrofitted at the end
- Single codebase, dual platform — iOS and Android delivered simultaneously, reducing cost and time to mission by up to 50%
- Mobile DevOps pipeline — CI/CD automation reduces manual handoffs, accelerating delivery without sacrificing security

Why Veridian Mobile

- **Security-First** — Zero Trust architecture integrated into the development lifecycle — not a feature, a foundation
- **Dual Platform** — Flutter-based single codebase delivers iOS and Android simultaneously — faster, leaner, mission-ready
- **DDIL Ready** — Designed to operate in DDIL environments — built for demanding field conditions
- **Integrated Platform** — Part of the Veridian Zero Trust Data Security Platform — mobile as one layer of an integrated security stack
- **NVIDIA Inception** — NVIDIA Inception Partner — AI inference capabilities extend from the DPU to the mobile edge
- **Registered** — CAGE 95R01 | UEI DVENZKF8TKM4 | Small Business LLC

Company Snapshot

Legal Name
Veridian LLC

Practice Area
Secure Mobile Application Development

Platforms
iOS & Android (Flutter / Swift / Kotlin)

Clients Served
Federal Civilian & DoD Environments

Website
veridian.llc

Contact
hello@veridian.llc

Mission Outcomes

Faster Time to Mission

Single Flutter codebase delivers iOS + Android simultaneously — reducing development time by up to 50%

Reduced Security Debt

Security is architecture, not an afterthought — reducing costly post-deployment remediation

Field-Proven Resilience

Offline-first design supports full mission capability in DDIL environments

NAICS Codes

541512 Computer Systems Design Services

541519 Other Computer Related Services

541715 R&D in Computer Science

Business Information

CAGE Code
95R01

UEI / SAM
