

VERIDIAN

ZERO TRUST DATA SECURITY PLATFORM

CAPABILITY STATEMENT

Strengthening Security at the Hardware Layer — Engineered for Confident Defense.

What We Deliver

- Engineered for high-confidence threat detection — AI-driven anomaly detection designed to catch threats in real time while minimizing false negatives
- Designed for maximum data containment — sensitive data stays within our hardware-enforced boundary at the silicon level, not the software level
- Built for autonomous response — threats are detected, contained, and addressed with minimal analyst intervention or delay
- Security enforced below the OS — invisible to adversaries, resistant to software-based threats and insider attacks
- Zero Trust at the hardware boundary — no implicit trust granted to any user, device, or network segment
- Rapid deployment — integrates with existing federal infrastructure without rearchitecting your environment
- Compliance-ready from day one — NIST SP 800-207, CMMC, and FedRAMP frameworks built into every engagement
- Mission continuity — operates in DDIL conditions without performance degradation

Why Veridian

- **Hardware-First** — A Zero Trust platform enforced at the hardware layer — not the software layer where adversaries already operate
- **NVIDIA Inception** — NVIDIA Inception Partner leveraging BlueField-3 DPU for hardware-accelerated security enforcement
- **Patent Pending** — Patent-pending technology that narrows the gap between detection and response — from hours to near real-time
- **Mission-Focused** — Purpose-built for federal and defense missions — decades of government operational experience in every engagement
- **Integrated** — One partner for platform and professional services — reducing vendor complexity and integration risk
- **Early Access** — Early access program available now for qualifying federal civilian and DoD agencies

Company Snapshot

Legal Name

Veridian LLC

Brand Name

Veridian Zero Trust Data Security Platform

Headquarters

Bristow, VA, USA

Website

veridian.llc

Contact

hello@veridian.llc

NAICS Codes

541512	Computer Systems Design Services
541519	Other Computer Related Services
541690	Other Scientific & Technical Consulting
541715	R&D in Computer Science
611420	Computer Training

Business Information

CAGE Code

95R01

UEI / SAM

DVENZKF8TKM4

Business Type

Small Business

Entity Type

LLC

Recognition & Credentials

- > NVIDIA Inception Program Partner
- > Patent Pending — ZT Hardware Enforcement
- > NIST SP 800-207 Zero Trust Architecture
- > CMMC & FedRAMP Framework Aligned
